4. Compliance Art 14 CBD Check table

The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bonds would satisfy the eligibility criteria for Article 14(2) of the Covered Bond Directive (EU) 2019/2162. It should be noted, however, that whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 575/2013 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

C. Harmonised Transparency Template - Glossary

HTT 2025

The definitions below reflect the national specificities

Field Number	1. Glossary - Standard Harmonised Items	Definition
HG.1.1	**OC Calculation: Statutory**	According to the Portuguese covered bonds legislation, the outstanding amount of covered bonds issued by an Institution may not exceed 95% of the cover assets amount, ie, the minimum legal OC is 5.0%.
HG.1.2	**OC Calculation: Contractual**	Commited OC is the level of OC the Issuer has agreed and is commited to maintain. In some circumstances, the level of commited OC is the level required by Rating Agencies to maintain the current levels of the Covered Bonds.
HG.1.3	**OC Calculation: Voluntary**	The actual overcollateralisation (OC) ratio is calculated by dividing (i) the total outstanding balance of the credits excluding accrued interest plus Other Assets included in the cover pool by (ii) the total nominal amount of the covered bonds excluding accrued interest. For clarification purposes, the Other Assets are calculated the following way: (a) Deposits are valued according to their amount; (b) The eligible assets for Eurosystem credit transactions are valued according to the rules for valuation defined by the Eurosystem or, if lower according to its nominal value plus accrued interest
HG.1.4	**Interest Rate Types**	Fixed rate / floating rate
HG.1.5	**Residual Life Buckets of Cover assets [i.e. how is the contractual and/or expected residual life defined? What assumptions eg, in terms of prepayments? etc.]**	Cover assets amortisation profile according to principal payment schedulled assuming no prepayments nor defaults
HG.1.6	**Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances? Etc.]**	Covered Bonds maturities according to contractual maturities not considering the extension period
HG.1.7	**Maturity Extention Triggers**	Covered bond maturities can be extended upon, either the withdrawal of the issuer's banking license, or a foreseeable or actual failure to pay amounts due at the scheduled maturity that cannot be remedied within 10 business days. A failure to pay and its respective grounds must be communicated to the CMVM at least 10 days before the maturity extension's effective date. The CMVM can oppose to such extension within a 10-day period.
HG.1.8	**LTVs: Definition**	Current LTV Unindexed - It is calculated by dividing the outstanding balance of the loan by the value of the underlying property (last physical valuation); Current LTV Indexed - It is calculated by dividing the outstanding balance of the loan by the latest valuation amount of the underlying property (i.e. indexed value or last physical valuation);
HG.1.9	**LTVs: Calculation of property/shipping value**	Property valuation according to the latest on-site appraisal or according to indices or statistical methodes approved by the Bank of Portugal;
HG.1.10	**LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation Model (AVM) or on-site audits**	Unindexed: Valuations done through on-site appraisals; Indexed: By applying an indice or statistical method considered appropriate duly submitted to the Bank of Portugal
HG.1.11	**LTVs: Frequency and time of last valuation**	A full valuation of the underlying properties must be performed by an independent appraiser, at origination or after, prior to the inclusion of the mortgage loan in the cover pool. Properties should also be assessed according to the following rules: - The value of residential properties should be checked on a frequent basis, at least every three years. This procedure can be done using statistical models approved by the Bank of Portugal; in case of substancial fall in the value of the property, it must be re-appraised by an expert.
HG.1.12	**Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial real estate, etc. Same for shipping where relecvant**	Portuguese covered bonds legislation defines two mortgage types as eligible for Covered Bonds: residential mortgages (with a maximum LTV of 80%) and commercial mortgages (with a maximum LTV of 60%). The current cover pool includes residential mortgages only
HG.1.13	**Hedging Strategy (please explain how you address interest rate and currency risk)**	Fixed rate Covered Bonds may be hedged with fix-to-floating swaps; the hedging of the foreign exchange risk is mandatory
HG.1.14	**Non-performing loans**	According to the Portuguese covered bonds legislation, any loan which is in arrears by more than 90 days must be removed from the pool and substituted by another loan which fulfils the eligibility criteria. Therefore, there are no NPL's included in the cover pool

Notes

[1] Soft Bullet

Covered bond maturities can be extended upon, either the withdrawal of the issuer's banking license, or a foreseeable or actual failure to pay amounts due at the scheduled maturity that cannot be remedied within 10 business days. A failure to pay and its respective grounds must be communicated to the CMVM at least 10 days before the maturity extension's effective date. The CMVM can oppose to such extension within a 10-day period.

[2] Other Assets

In addition to the mortgage assets, other assets (or substitution assets) may be included in the cover pool up to an amount equal to 20% of the cover pool, subject to the following eligibility criteria:
- Deposit with the Bank of Portugal in cash or ECB eligible securities, or
- Deposits held with credit institutions rated at least A-.

[3] Overcollateralisation

The overcollateralisation ratios are calculated by dividing (i) the total outstanding balance of the assets included in the cover pool by (ii) the total nominal amount of the covered bonds (both excluding accrued interest). For clarification purposes, all assets included in the cover pool are eligible assets.

[4] Net Present Value (NPV)

The NPV of the assets is obtained by discounting all future cash flows with the IRS curve plus relevant spread.
The NPV of the liabilities is obtained by discounting all future cash flows with the IRS curve plus relevant spread .
Substitution assets as well as any derivatives in the pool are marked at their market value.
NPV of liabilities cannot exceed the NPV of the portfolio assigned to the bond, including derivatives.
Stress testing - Net present value is also calculated for a 200 bps shift upwards and downwards of the discounting curve.

[5] Loan-to-Value

The Current Unindexed LTV is calculated by dividing the outstanding balance of the loan by the value of the underlying property (last physical valuation).
A full valuation of the underlying properties must have been performed by an independent appraiser, at origination or after, prior to the inclusion of the mortgage loan in the cover pool.
Properties (both residential and commercial) should also be revalued regularly:
- For commercial assets this must be done on an annual basis;
-Also the value of the mortgage property should be checked on a frequent basis, at least every three years, in order to identify the properties that require appraisal by an expert (this procedure can be done using statistcal models approved by the Bank of Portugal).

[6] Insured Property

All mortgages must have property damage insurance covering fire and floods.

[7] Interest Rate Type

These loans are fixed rate as of the reference date, including loans granted on a mixed-rate basis, i.e., loans with an initial fixed rate period after which interest rate reverts to Euribor-indexed floating rate until maturity
